

Introducing Social Distancing To The Payment Industry

Keep your staff safe and your customers safe by accepting contactless payments. Contactless payments allows you and your staff to process payments without having to physically touch the customers card. All of our featured Dejavoo and Pax terminals and pin pads are equipped with a contactless payment option that can accept eWallet payments.

Introducing Social Distancing To The Payment Industry

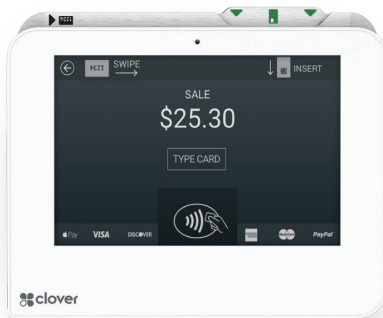

Our Clover® devices are also equipped with contactless payment options, as well as having screens that are antimicrobial. These screens help eliminate the growth of microorganisms and germs such as the ones found in the COVID-19 virus. Our contactless payment solutions not only help keep you safe, but your customers safe as well assuring them that your place of business is taking the best safety precautions.

Introducing Social Distancing To The Payment Industry

Along with contactless payment solutions, our merchants have implemented a social distancing policy within their place of business. Merchants are asking their customers to stand behind tables that are placed 6ft away from their employees avoiding any close up interactions. Along with placing tables, our merchants have also placed plexiglass dividers at their points of sale to separate themselves from the customer to lower the risk of exposure to the COVID-19 virus.

At Swipe4Free we value our merchants safety and provide them with the tools they need to keep themselves, their employees, and customers safe while also providing them with the best merchant processing services in the Nation. Contact Swipe4Free today to find out how we can help you become Covid-19 safe and eliminate your processing fees helping you offset any financial losses during this time.
